## EDUCATION

### California Polytechnic State University-San Luis Obispo

Bachelor of Science, Computer Science

August 2026 - Present

San Luis Obispo, CA

### MiraCosta Community College

Associates of Science in Computer Science for Transfer

Associates of Science in Mathematics for Transfer

Associates of Arts in Liberal Arts: Mathematics and Sciences

August 2024 - May 2026

Oceanside, CA

Film Club

Game Design Club

Computer Science Club

## SKILLS

- Languages: Java, C++, Python, HTML/CSS, JavaScript, Assembly
- Frameworks: React, Node.js, Git/GitHub Developer
- Tools: VSCode, Linux, Figma, Adobe Creative Suite

## EXPERIENCE

### Webmaster

SkillsCommons & Merlot · Part-time · Hybrid

April 2026 – Present

Long Beach, CA

- Webmaster & Content Management Oversee technical operations, user support, and web content across MERLOT and SkillsCommons platforms, including WordPress sites and YouTube channels.
- Platform Moderation & Improvement Moderate user-submitted content to ensure quality and actively contribute creative ideas to enhance overall platform functionality.

### Software Engineer Internship

Epik Systems · Part-time · On-site

November 2023 – Aug 2024

Carlsbad, CA

- Web & Product Design Designed client websites using React and WordPress, and led the UX/UI design for the company's AI product and its corresponding website using Figma.
- Collaboration & User Experience Collaborated with software staff to provide feedback and implement improvements for the AI product's overall user experience.

## PROJECTS

### Digital Porfolio (Website)

Jan 2023 – Present

- Design & Development Built a modern Single Page Application using React (Vite), with intentional UX/UI design and prototyping completed in Figma prior to development.
- Deployment & Content Hosted on GitHub Pages for version-controlled reliability, showcasing a diverse portfolio of work including academic progress at MiraCosta College.

### Stove Solutions

August 2023 - February 2024

- System Development & Integration Designed and built a sensor-based safety system using Arduino and an Android device to automatically detect gas leaks and shut off stoves with app-based monitoring.
- Engineering & Project Management Applied the iterative engineering design process to integrate mechanical and sensor technologies, while strengthening problem-solving, safety compliance, and presentation skills.

### Sage Creek Genius Project

September 2022 - January 2024

- Design & Development Designed and implemented digital badges using Adobe Illustrator to motivate student advancement across computer science, engineering, photography, and biomed pathways.
- Leadership & Advocacy Managed the end-to-end badge development process and successfully presented the initiative to school leaders and at conferences to advocate for the program.
