EDUCATION

MiraCosta Community College <i>Computer Science</i> - Computer Science for transfer - Relevant Coursework: - MATH 265 (Differential Equations), MATH 270 (Linear Algebra) - CS 112 (Introduction to Java II), CS 113 (Data Structures), CS 150 (Intro to C++), CS 151 (Advanced C++), CS220 (CS 220, Computer Architecture and Assembly Language), CS 226 (Discrete Structures)	Feb 2025 - Present <i>Oceanside, CA</i>
MiraCosta Community College <i>Mathematics</i> • High school community college concurrent enrollment. • Relevant Coursework: Math 260 (Calculus and Analytical Geometry III)	June 2022 - June 2024 <i>Oceanside, CA</i>
Sage Creek High School <i>Computer Science and Engineering</i> • Relevant Coursework: Project Lead the Way's Engineering Pathway	September 2020 - June 2024 <i>Carlsbad, CA</i>

SKILLS

- Languages: Java, C++, Python, HTML/CSS, JavaScript, Assembly
- Frameworks: React, Node.js, Git/GitHub Developer
- Tools: VSCode, Linux, Figma, Adobe Creative Suite

EXPERIENCE

CSU AI Internship <i>California State University, Office of the Chancellor · Part-time</i> • Developing AI-powered metadata enhancement workflows in Ruby on Rails for the CSU ScholarWorks digital repository. • Integrating OpenAI APIs to auto-generate and improve metadata (subjects, abstracts, descriptions, disciplines). • Analyzing submitted files and existing records to identify metadata gaps and inconsistencies. • Collaborating with repository staff to ensure outputs match CSU metadata standards and controlled vocabularies. • Documenting processes, code, and results to support long-term maintenance and future development.	February 2025 – Present <i>Carlsbad, CA</i>
Software Engineer Internship <i>Epik Systems · Part-time</i> • Designed clients websites with JavaScript (React) and Wordpress. • UX and UI design for the companies AI product using Figma. • Designed and improved the companies AI product website. • Provided feedback for companies AI product user experience. • Collaborated with software staff.	November 2023 – Aug 2024 <i>Carlsbad, CA</i>

Quality Control Specialist

Shoreline Electronics · Part-time

- Conducted quality assurance testing on products to guarantee functionality.
- Packaged and prepared orders to ship.

May 2023 - October 2023

Carlsbad, CA

PROJECTS

Digital Porfolio (Website)

- Personal website showcasing key projects (robotics, stove solutions initiative, photography).
- Gained experience in website deployment and web design through Wordpress.
- Designed in Figma, implemented with React and pushed to GitHub pages.
- Dynamic, regularly updated platform highlighting technical and creative growth.

Jan 2023 – Present

Stove Solutions

- Developed a sensor-based system for an engineering class project that automatically detects gas leaks and shuts off stoves with app-based monitoring. Control through and Arduino and an Android Device.
- Gained experience in designing and building mechanical and sensor-based systems.
- Strengthened problem-solving and brainstorming skills.
- Increased understanding of safety standards and technology integration.
- Learned to integrate app-based monitoring and control features.
- Applied the engineering design process for iterative development and testing.
- Gained project management and presentation skills.

August 2023 - February 2024

Sage Creek Genius Project

- Created digital badges for student pathways in computer science, engineering, photography, and biomed to motivate educational advancement.
- Managed the badge development and implementation process.
- Presented the project to school leaders and at conferences and enhanced my communication and presentation skills for effective advocacy.
- Designed badges using Adobe Illustrator.

September 2022 - January 2024

EXTRACURRICULAR

Film Club

- Collaborated in a hands-on creative environment discussing films, sharing projects, and building portfolios.
- Provided constructive feedback and contributed ideas to support members’ creative growth.
- Practiced storytelling, initiative, and teamwork through group projects and critiques.

August 2025 – Present

Computer Science for the Common Good Club

- Explored ethical and socially responsible applications of computer science.
- Contributed to discussions on accessibility, responsible innovation, and community-focused technology.
- Collaborated on projects using CS as a tool for positive, real-world impact.

August 2025 – Present

LeetCode Club

- Strengthened algorithmic thinking and technical interview problem-solving skills.
- Collaborated with peers to break down complex coding challenges.
- Explained strategies and supported others’ learning, improving communication and teaching skills.

August 2025 – Present

Game Design Club

- Designed and prototyped games using the Godot open-source engine.
- Contributed to critiques, design documentation, and game jam teamwork.
- Shared resources and encouraged open communication to support peers’ creative confidence.

August 2025 – Present

Controls UI Member | Titan Rover Robotics Club

August 2024 – May 2025

- Update rover’s control system, attend weekly workshops to implement continuous improvement.
- Designing, creating, and implementing the user interface for controlling the rover.
- Update and maintain Titan Rover’s website and create promotional material for clubs events.

Software Lead | Crow Force High School Robotics Club

July 2020 – June 2024

- Managed the Crow Force software team.
- Taught new members Java and First Tech Challenge (FTC) code libraries.
- Developed code designed to obtain as many points as possible in competition.

VOLUNTEERING

Digital Libraries Project

June 2022 - August 2022

- Developed a semi-automated process to parse bibliographic data for the library institutional repository project at California State University, Office of the Chancellor.
- Enhanced skills in data parsing and automation.
- Contributed to educational technology projects for K-12 teacher preparation and CSU faculty development.
- Worked within a team focused on improving library systems.
- Addressed challenges in managing bibliographic data efficiently.

Summer Reading Program

June 2021 - August 2022

- As part of the Summer Reading Program I helped encourage children to read by serving as one of the volunteers, at Dove Library, who children would report to and talk about the books they were reading.
